
How much land do we need to build
1.5 MILLION
to fix **England**'s housing crisis?

How much land does a home need?

Humans are roughly the same size and shape, with the same needs.

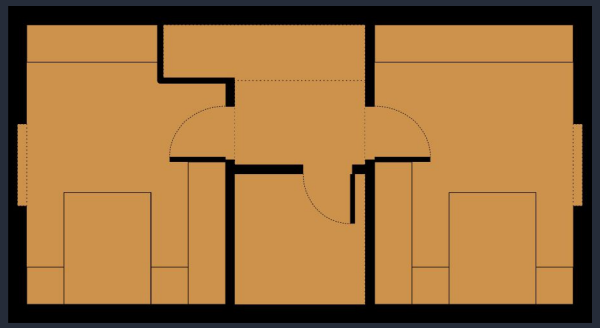

There are standard housing patterns.

Number of bedrooms(b)	Number of bed spaces (persons)	1 storey dwellings	2 storey dwellings	3 storey dwellings
1b	1p	39 (37) *		
	2p	50	58	
2b	3p	61	70	
	4p	70	79	
3b	4p	74	84	90
	5p	86	93	99
	6p	95	102	108
4b	5p	90	97	103
	6p	99	106	112
	7p	108	115	121
	8p	117	124	130
5b	6p	103	110	116
	7p	112	119	125
	8p	121	128	134
6b	7p	116	123	129
	8p	125	132	138

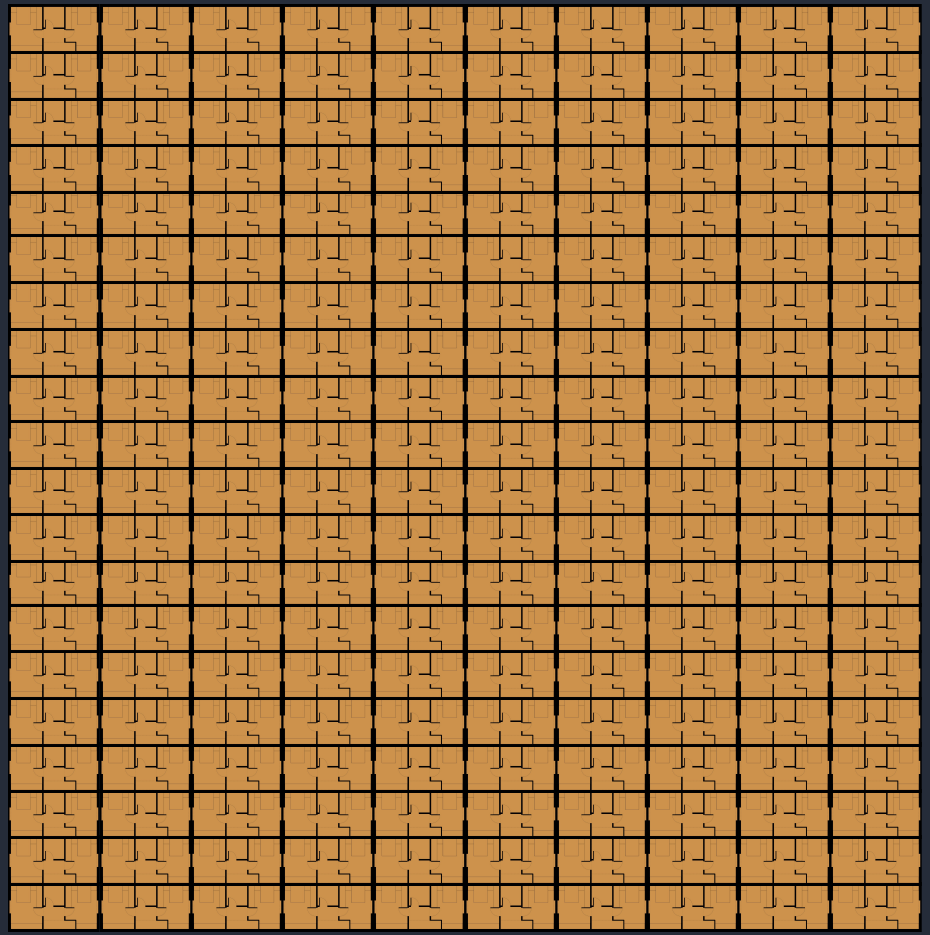

From these patterns we can derive standard house sizes.

10m

5m

An average house has a footprint of **50sqm**

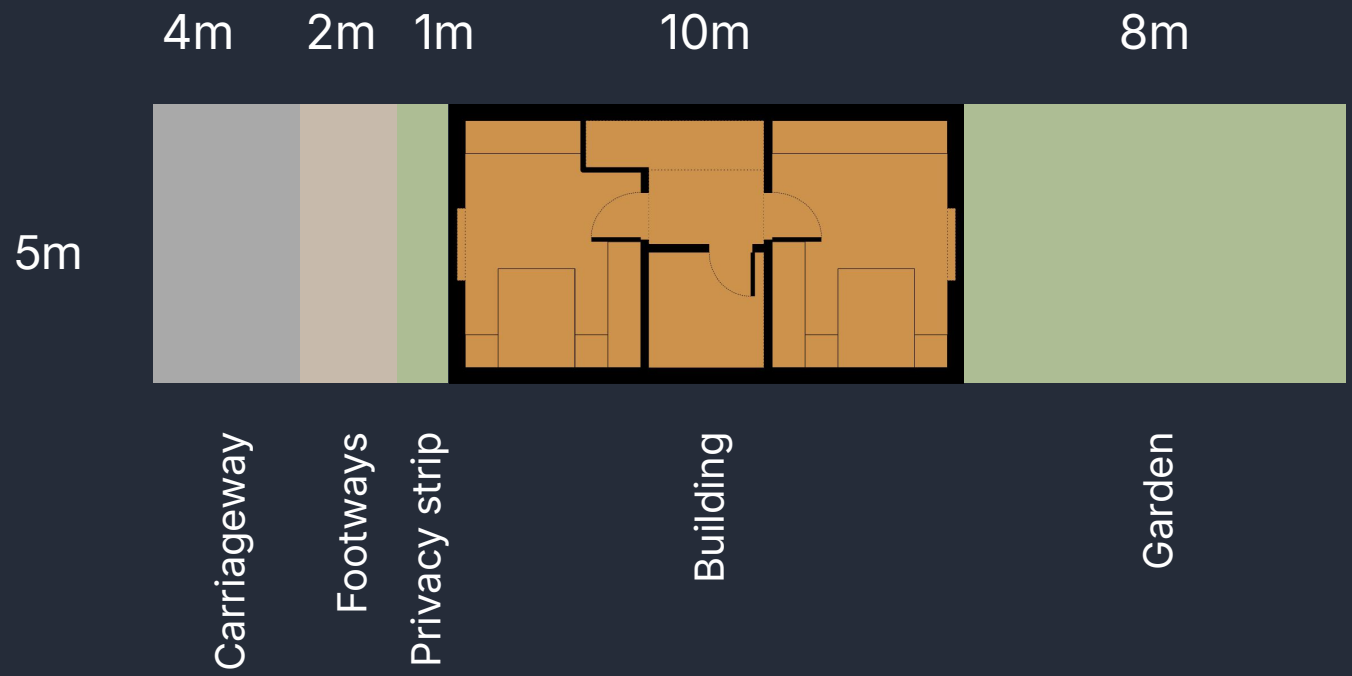

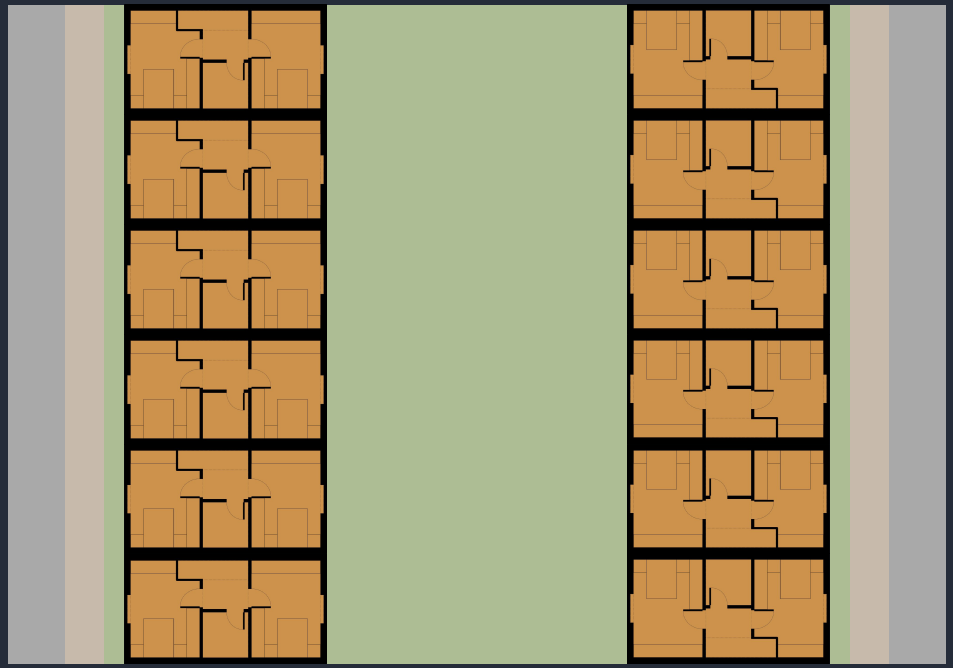

1 ha = 200 homes

1.5m homes = 7,500 Ha

Detached houses

Density

44 dph

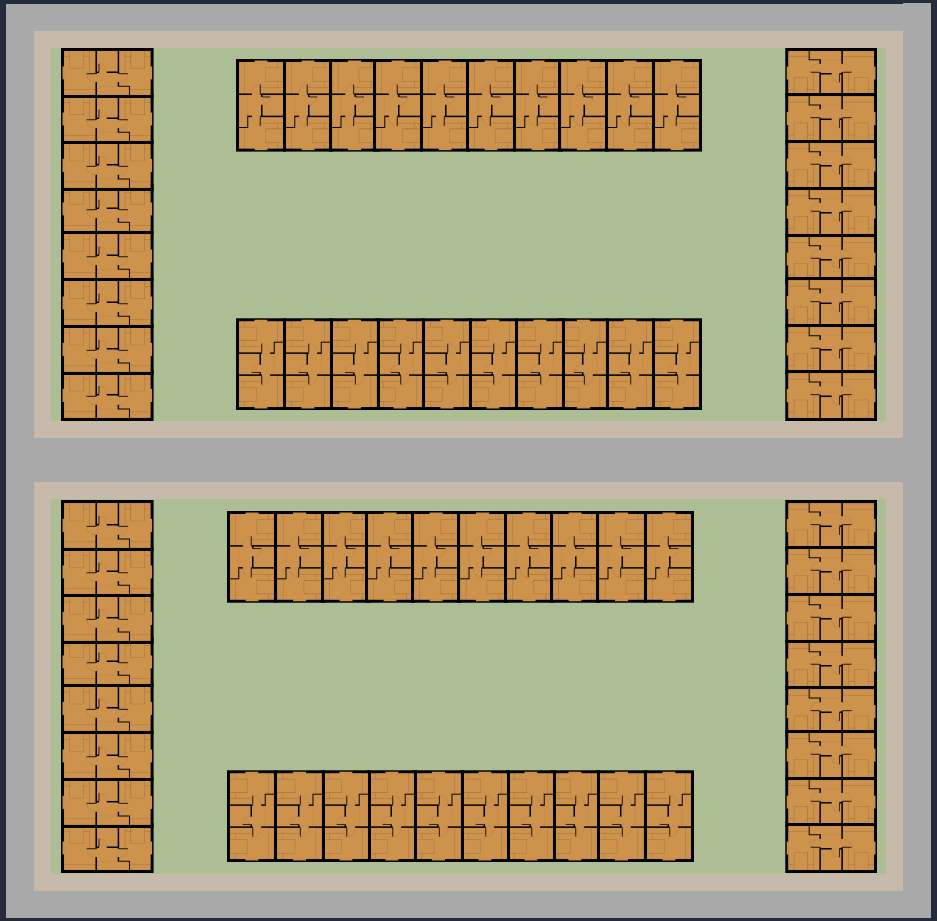

Semi-detached houses

Density

56 dph

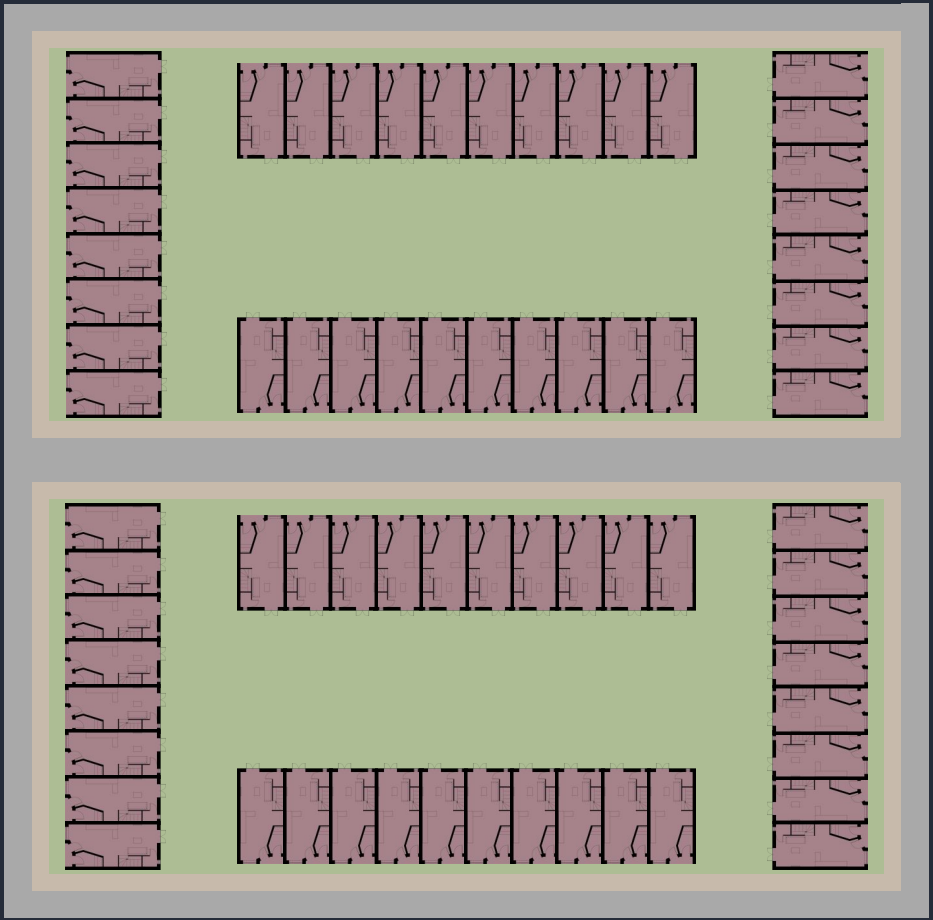

Terraced houses

(2-4 storey)

Density

72 dph

Duplex houses

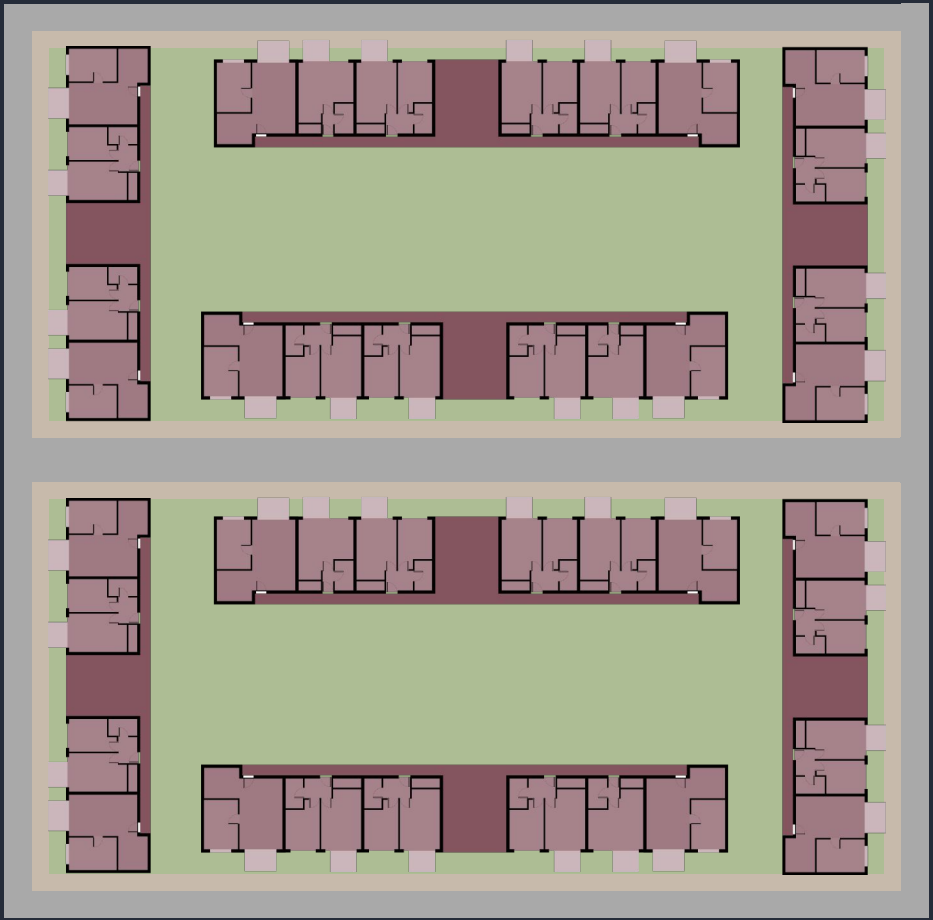

(4 storey)

Density

144 dph

Chobham Manor, London

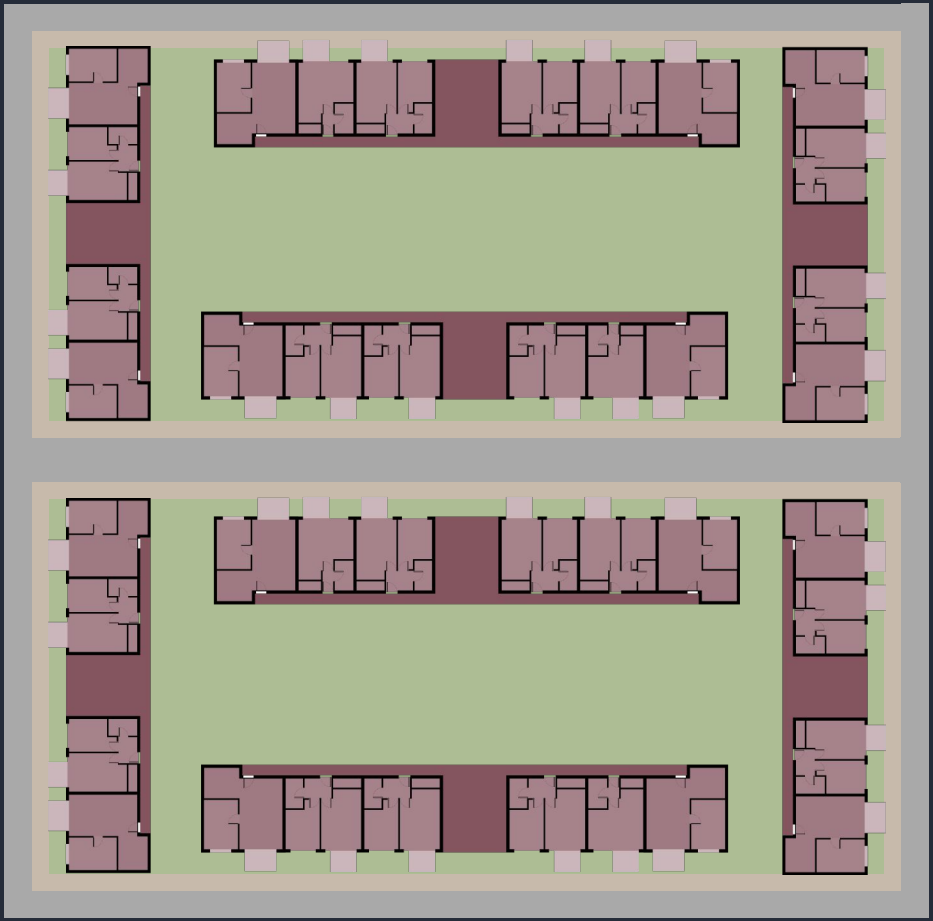

Deck access apartments

(4 storey)

Density

160 dph

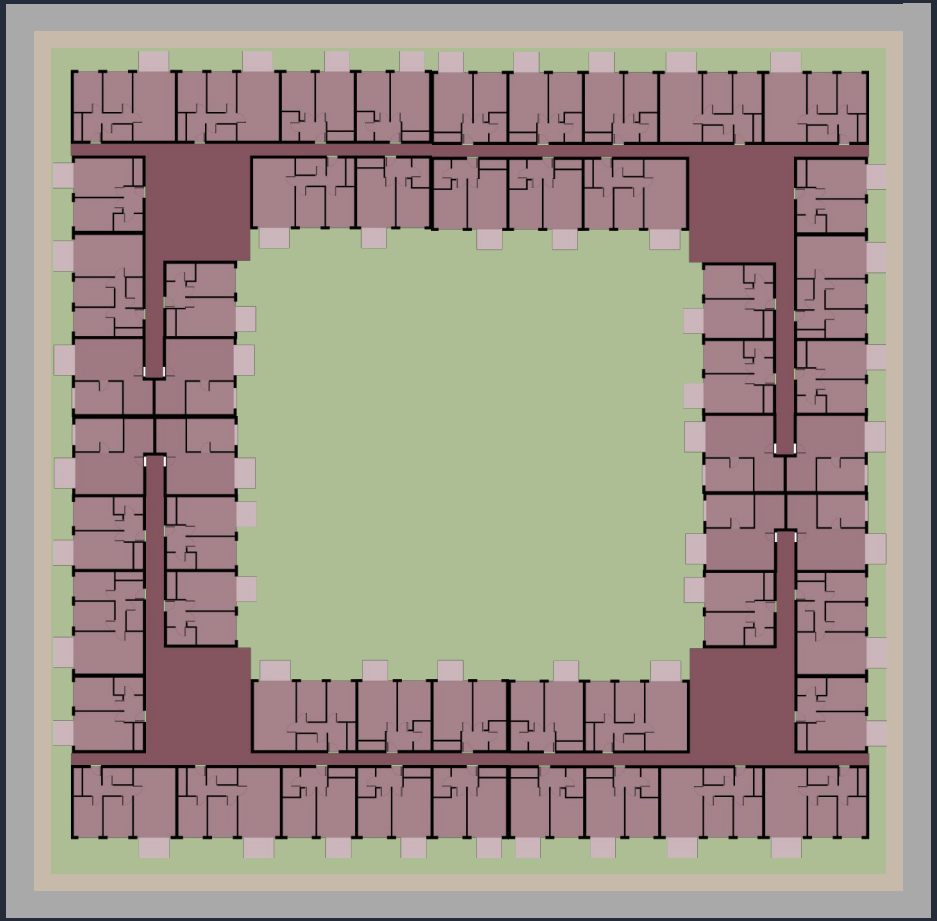

Deck access apartments

(6 storey)

Density

240 dph

Double loaded blocks

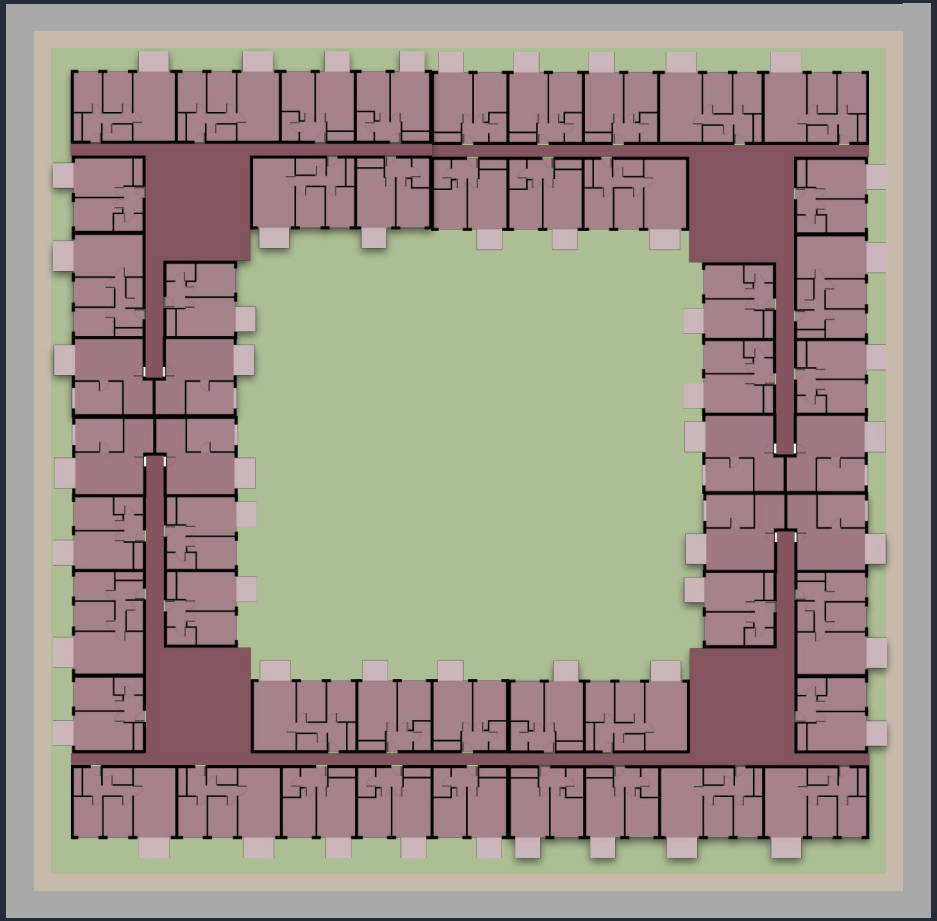

(8 storey)

Density

416 dph

Olympic Park, London

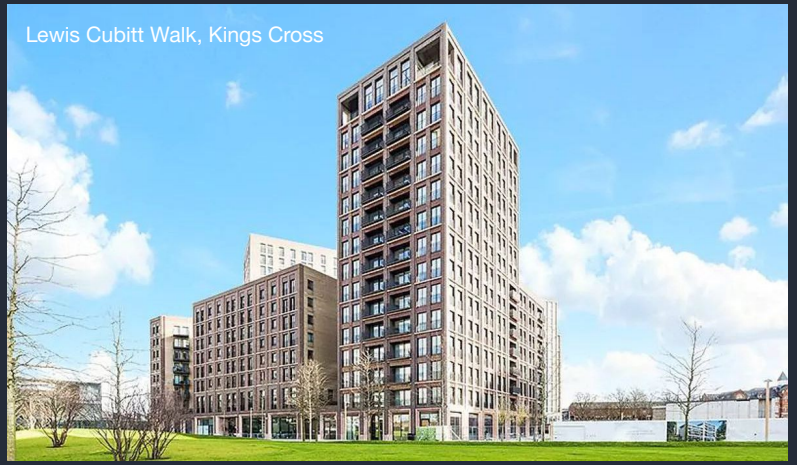

Double loaded w/ towers

(8 + 20 storeys)

Density

584 dph

Depending on the types of places we want to create, the amount of land we need can vary by **up to 10X**

	Detached	Semi detached	Terraces	Duplex	4 storey deck access	6 storey deck access	8 storey double loaded	8 storey double loaded
Density	44	56	72	144	160	240	416	584
5.1m Homes (Ha)	**34,090**	**26,785**	**20,833**	**10,416**	**9,375**	**6,250**	**3,605**	**2,568**

We need to understand the types of places we want to live in, before making policy decisions about land.
(There are **27,000** Hectares of brownfield land in England.)
