Flights move to Super Stansted ►

The world's busiest hub airport

Home runway

The case for closing Heathrow

Quiet for today's residents. Homes for tomorrow's.

220,000
new homes

500,000+
new residents

15 miles
to Hyde Park Corner

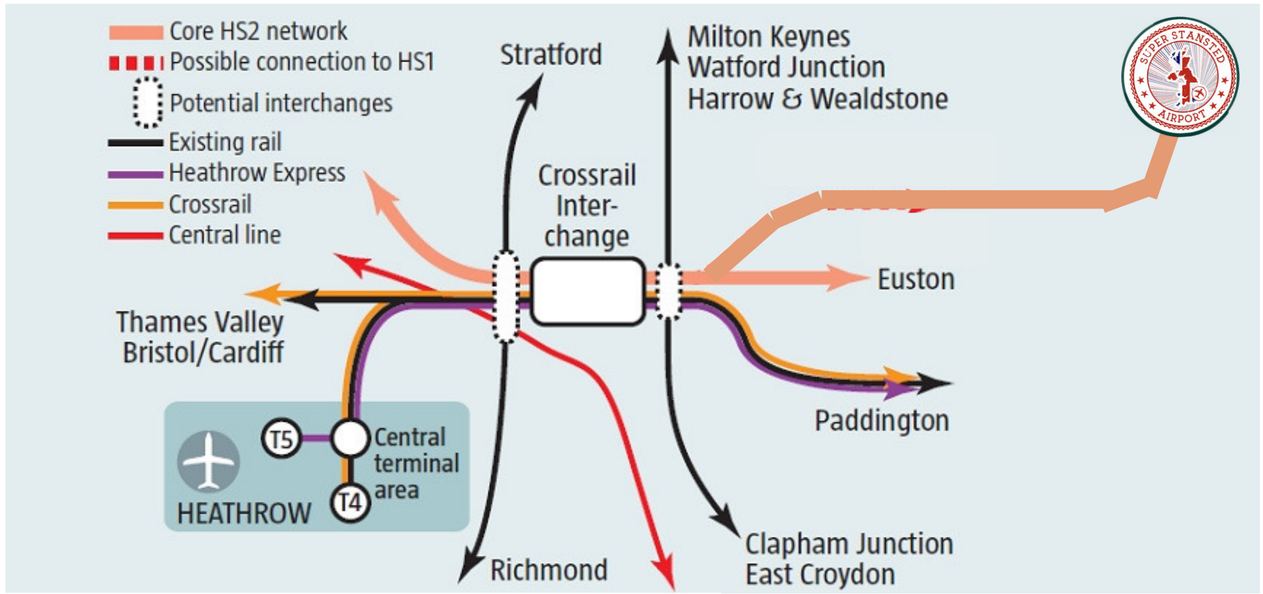

GARDEN BOROUGH OF Heathrow

CRESCAMUS UBI DESCENDIMUS

"Let us grow where we have landed"

An Extention of London’s Georgraphy

- Part of London’s urban area
- Not a commuter town
- 30 minutes to Paddington

Why Heathrow is the most valuable land in Britain?

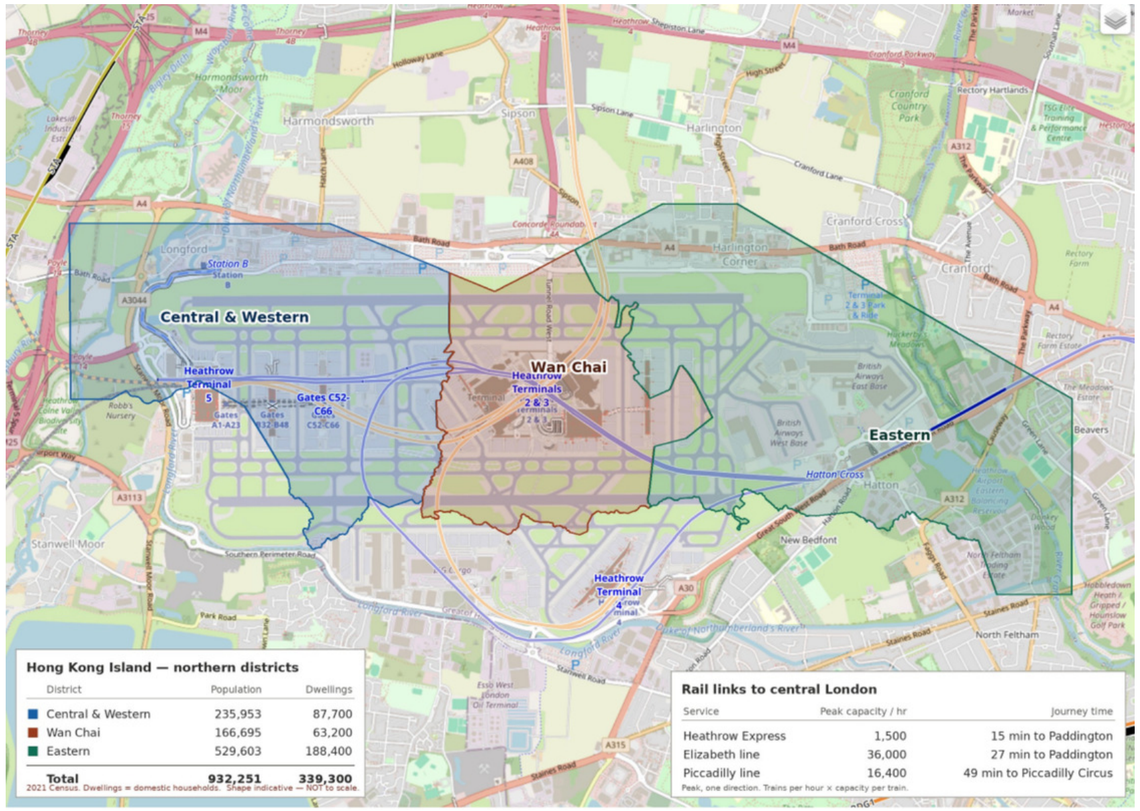

- 12.5 km^2 brown field site
- 41% increase in London’s brownfield land
  - registered for development

A Garden Bourgh @ Paris Density

- Room for 220,000 homes
  - @ Paris' density 20,000/km^2
- Room for over 500,000 people
  - Assuming 2.3 people per household

The option to go further?

- Hong Kong density
- Room for over 1 million people
- If built at Kowloon City's density
  - 12,000km^2 * 42,000/km^2

Vienese Casestudy: Neubau

- A new district
- Built profitably
- Metro integration
- 30,000 residents so far
  - Building at the same 20,000/km^2 density as Paris

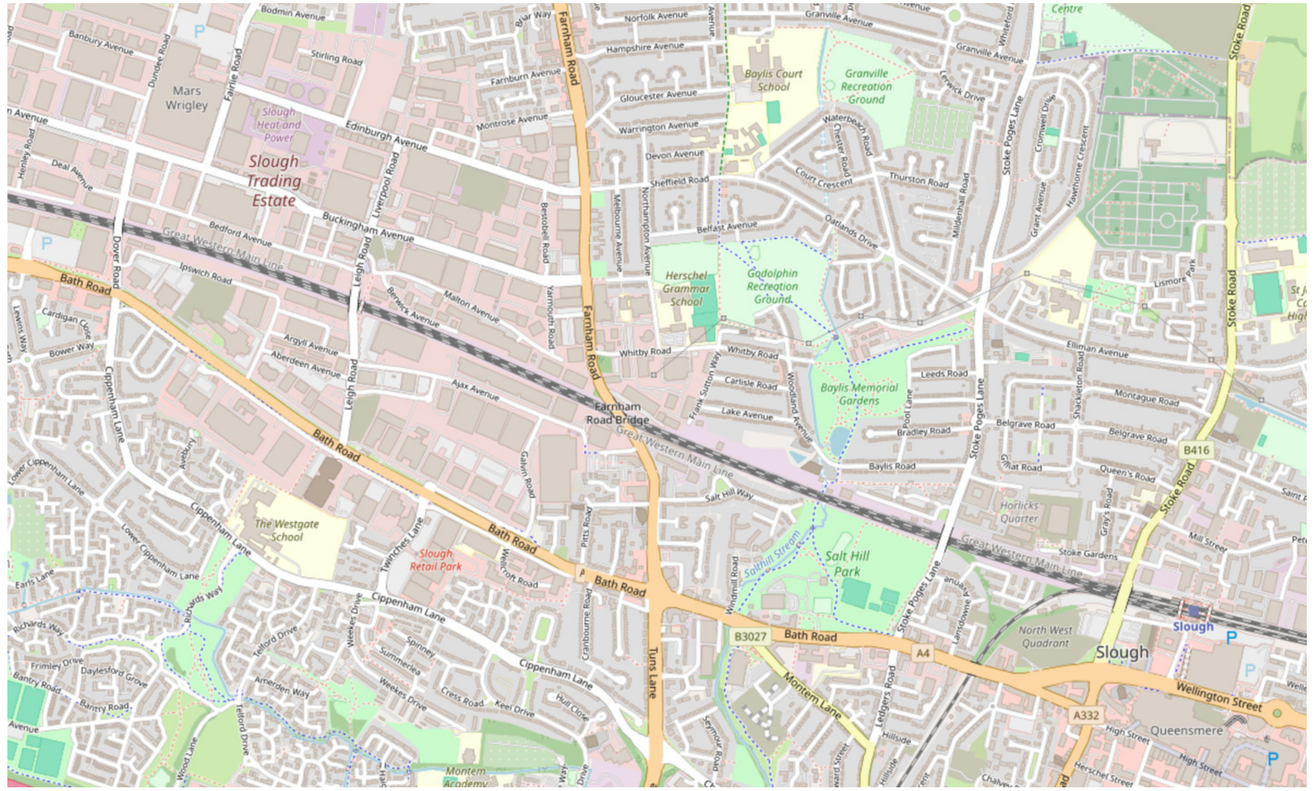

Feasibility: Land Value Increase

- **Land Value increase of £5 billion**
  - Building at the same 20,000/km^2 density as Paris
- **Land Value increase of £8 billion**
  - Building at the same 20,000/km^2 density as Hong Kong

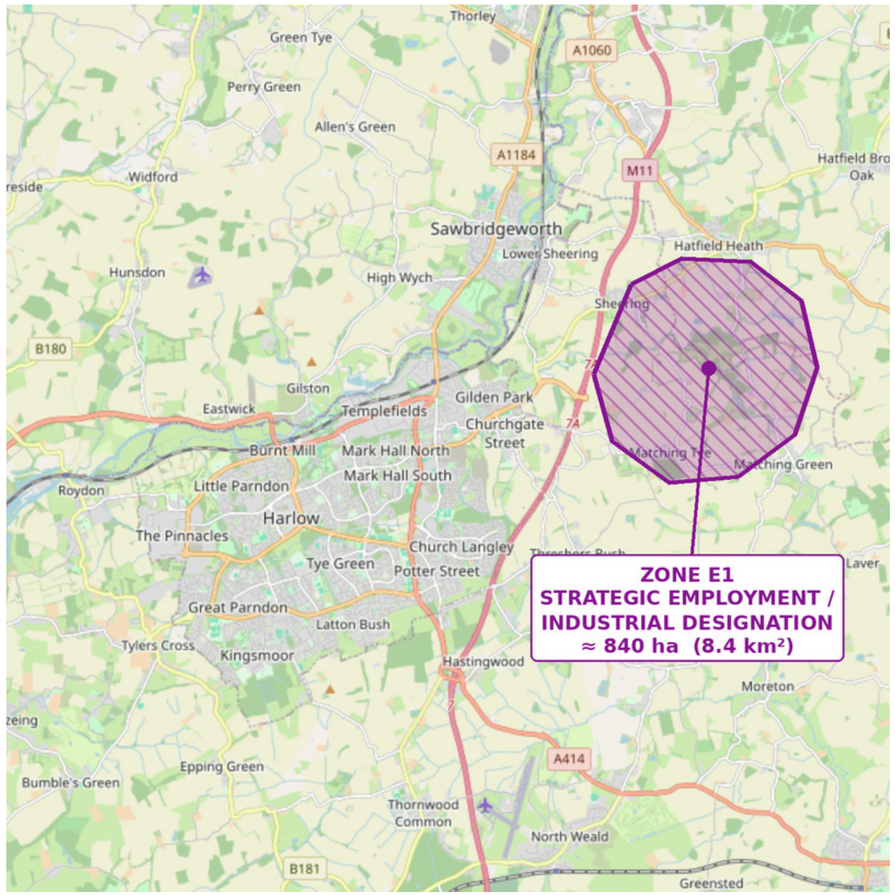

The industrial question?

- Slough Trading Estate
- Largest privately owned trading estate in Europe
- 350 buisness’ & over 20,000 employees

The move to Harlow

- Same amount of land
  - 8.4km^2
- Rail & Motorway connections
  - M11 corridor & West Anglia Mainline
- Close to the Super Stanstead Airport & Harwich Freight Port

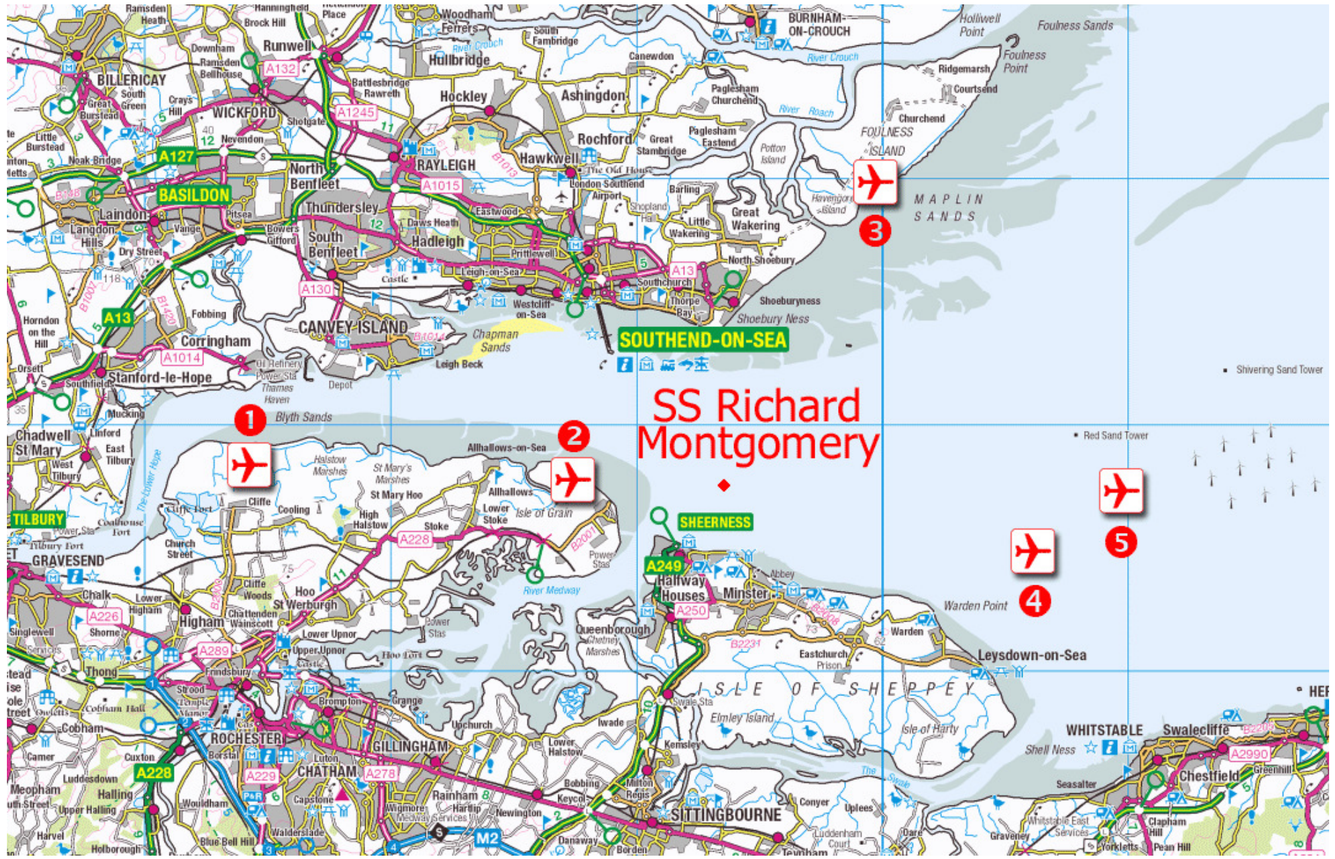

SUPER STANSTED AIRPORT

HUTCHISONPORTS HARWICH INTERNATIONAL

SUPER STANSTED
AIRPORT

Why past proposals failed

- Challenge of building an entirely new airport
- Poorly thought out locations

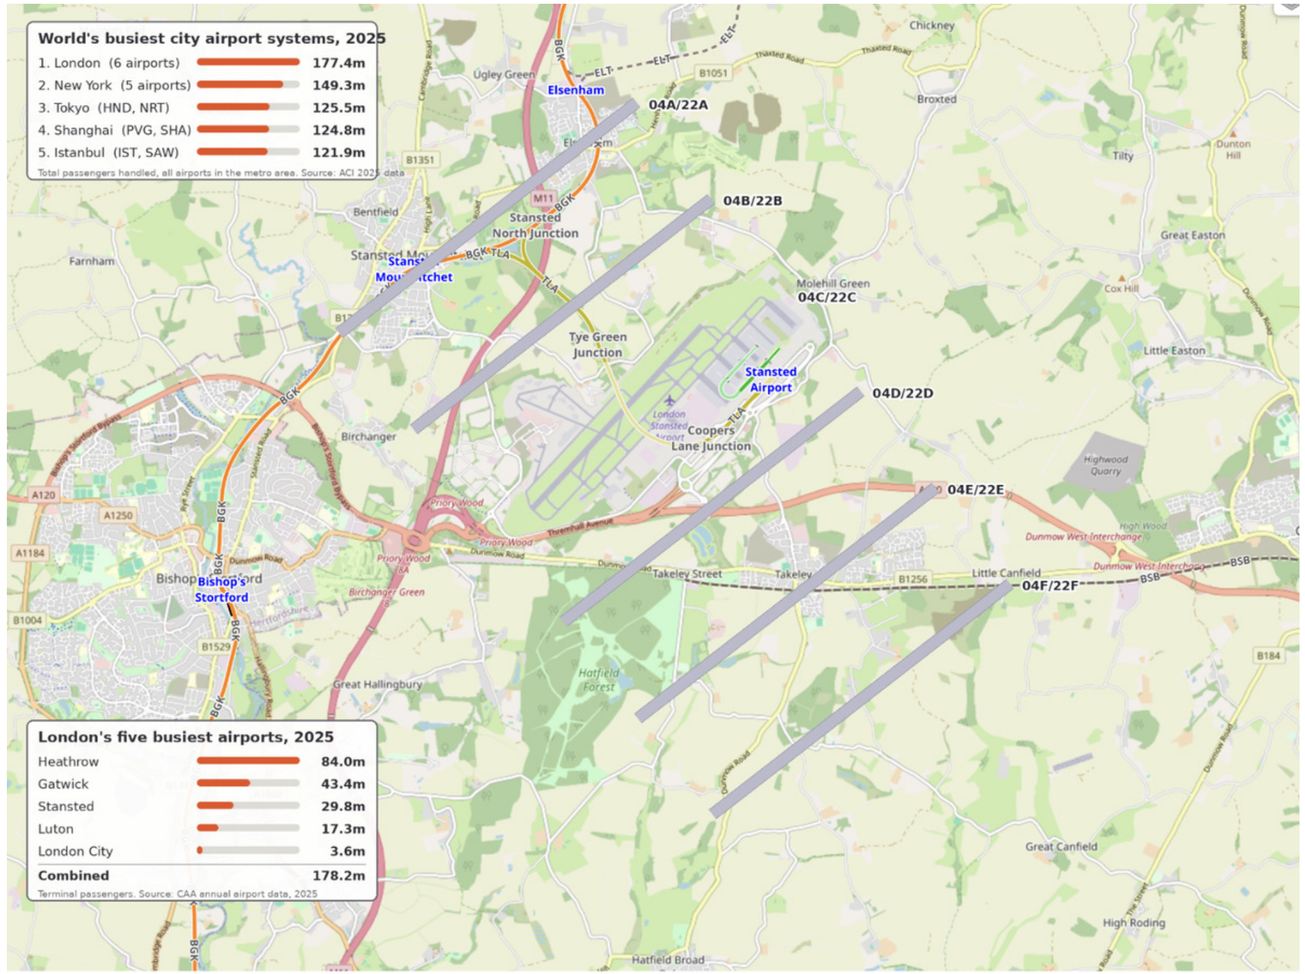

Why Stansted?

- Best to start with an existing airport and expand it
- The only London airport with few neighbours
  - Less than 80,000 people in the region

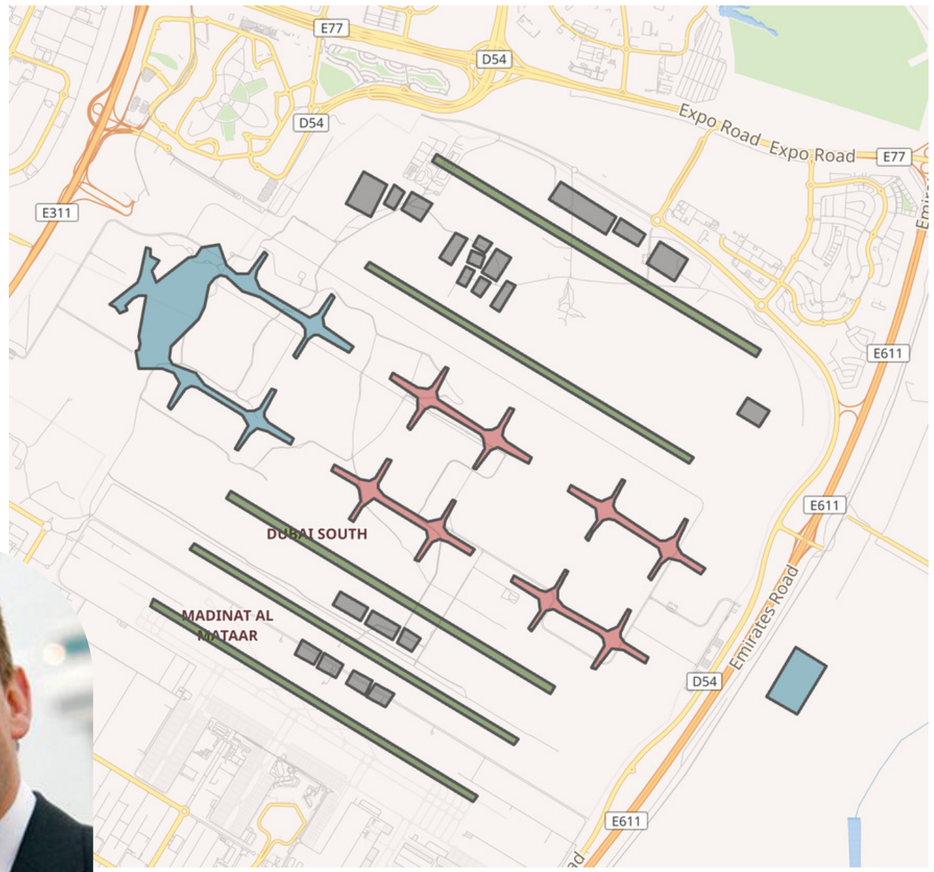

A 6 Runway Hub Airport

- 140 million passengers a year
  - Assuming it captures 80% of London’s airport system
- 200 million passengers a year
  - Assuming +30% from new interchanges

Dubai Casestudy: Al-Maktoum Airport

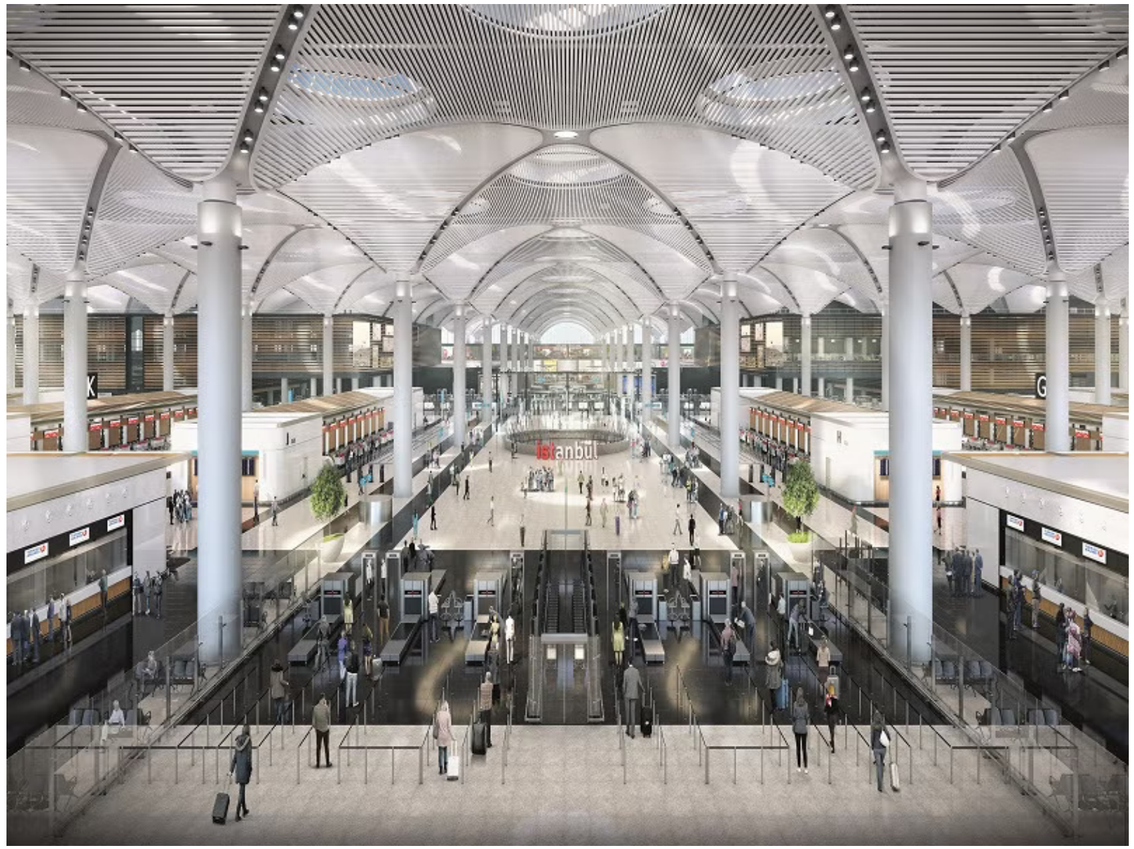

- Replacing Dubai’s current hub
- New 5-runway airport
- Designed for the future
  - 250,000,000 passenger capacity
- British CEO
  - Former boss of Gatwick

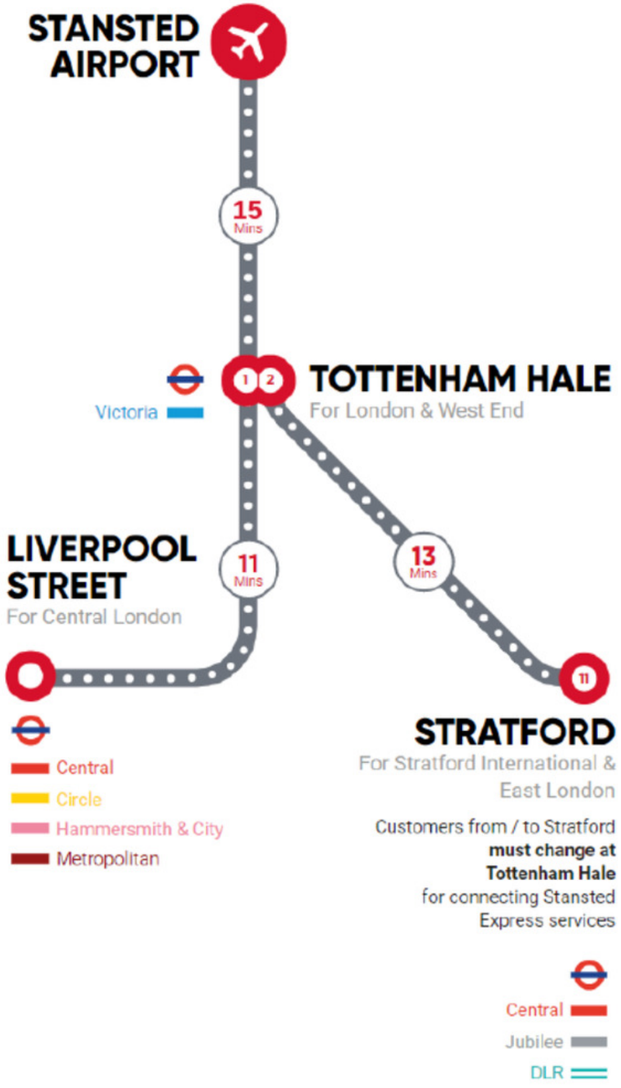

Feasibilty

- Dubai’s new airport
  - £35 billion
  - 5 runways
- Land Value Uplift:
  - £50 billion+
  - Assuming the new airport would have at least an equivalent land value and area to Heathrow

High Speed Rail Connection to Stansted

- New high-speed line
  - Along the M11 corridor
- 26 minutes to Liverpool Street Station
- 28 minutes to Stratford Station
  - Connection to Eurostar

Transporation Links Costs

- Stansted to London High Speed Rail Line
- £15 billion
  - At HS2 costs
- £2 billion
  - At Italian costs

Build Plan

Super Stansted Airport

- Construction of 2 runways
- Construction of the HS rail link
- Opening of the 3-runway airport
- Construction of 3 runways
- Opening of the 6-runway airport

Heathrow Garden Borough

- Heathrow Airport Closed
- Opening of the first 20k homes
- Continued opening of the city in batches of 20k homes

GARDEN BOROUGH OF Heathrow

Summary

- Up to 400,000 homes
- Up to 1 Million Residents
- 30 minutes
  - Elizabeth Line to Zone 1

- Up 250 million passangers
- Up to 6 Runways
- 26 minutes
  - Liverpool Street Station

Land Value Uplift

£8 + £50B+ = £58 Billion
